GLORY Retail Solution
CASHINFINITY®
Cash handling within the retail sector is costly and requires significant staff resources at all steps of the process. That's why accuracy, efficiency, and security are important. The retail sector is very diverse, and therefore a whole range of solutions is necessary to cater to the specific needs of each shop or chain store. CASHINFINITY, GLORY Retail Solution offers SMART cash management. It provides total secure closed cash handling, centralized control of cash inventory and optimization of all cash processes throughout a store. CASHINFINITY is the most advantageous cash management system with remarkable flexibility and extensibility for retailers to fit any size of store, various business segments and each investment plan.

CASHINFINITY offers many BENEFITS for retailers

- High security against attacks and theft
- Improves productivity, customer service and fund efficiency
- Eliminates discrepancies in cash
- Reduces CIT pick up and delivery
- Real-time inventory of cash / status management

The new secure closed cash management

This new solution consists of the compact cash recycling system CI-10, the cash recycling system CI-100, and cash management software CI-SERVER. This handles all cash operations from front office to back office. The interface cassette enables secure closed notes collection and replenishment throughout the store. The new CASHINFINITY is a secure end-to-end closed cash management solution.

Streamlines daily work of manager / cashier

The cash recycling system CI-100 handles not only the interface cassette of the CI-10 but also the loose notes of a manual cash drawer. This unique function gives retailers flexibility and extensibility. Direct Coin Dispense into the specified manual cash drawer offers the cashier easy and fast operation when preparing change fund. Two types of banknote collection (safe bag/collection cassette) are available.

Cash management software CI-SERVER which can be operated via a web browser, offers centralized cash management throughout a store: front/back office, interface cassette under transportation and the safe in the back office.

CI-100 counts and dispenses in two ways: loose notes and interface cassette, so that not only the CI-10 but also manual cash drawers are available at the checkout. This remarkable flexibility fits each investment plan of retailers.
Case Studies of CASHINFINITY.

CASHINFINITY offers many benefits for retailers:

- High security against attacks and theft
- Improves productivity, customer service, and fund efficiency
- Eliminates discrepancies in cash
- Reduces CIT pick up and delivery
- Real-time inventory of cash/status management

1. Supermarket (Front office solution)

## Introduction of Functions

**Exit shutter**
- Aids handling of partial change to a customer in case of incomplete dispensing due to jamming/inventory issues.

**Collection through outlet**
- Allows for nonstop coin collection into the bag蕙.

**Direct Coin Dispense**
- Into manual cash drawer

**Free layout of recycle module**
- Can assign frequently used denominations to multiple recycle modules.

**Reject foreign object**
- Enables nonstop counting and reduces jam trouble rate.

**Error Recovery Animation**
- If an error occurs, the POS screen can show a trouble-diagnosing animation to resolve the problem.
